Customer – Checklist for Barcode generation

Follow the steps below:	
1	<p>Step 1: Obtain an EAN Code To generate a barcode, you first need to have an EAN code. EAN codes are usually 13 digits long (EAN-13), though there are also 8-digit versions (EAN-8). You can obtain these codes: Register your company with GS1 and generate an APN number/EAN number</p>
2	<p>Step 2: Choose a Barcode Generator Once you have your EAN code, you can use a barcode generator to create the barcode image. There are several online tools and software available for generating barcodes. GS1/ Barcode.tec-it.com / https://www.seagullscientific.com/barcode-generator/ Free Online Barcode Generator BarTender (seagullscientific.com)</p> <ul style="list-style-type: none"> - Open the link, select GS1 (by Symbology), then “UPC-A..”, Then “EAN-13 80%”, click “Select” - Enter Data: “your EAN number”, click “next” - The barcode is generated, download it <p>Or Barcode.tec-it.com:</p> <ul style="list-style-type: none"> - Go to the website, then EAN/UPC – EAN 13 – Put the 13 digits EAN code and click, refresh. - You will have the barcode generate on the right. Click download. - Open the file and save it as PNG file, naming it as “Product name-size-tint-EAN number”.
3	<p>Step 3: Insert it on the label GS1 Retail and Non-Retail Barcode Size Guide.pdf (gs1my.org)</p>
